

**1. Default Application:**

a. **File:** *server.xml*

```
<Host name="localhost" appBase="webapps" unpackWARs="true"
autoDeploy="true">
```

```
<Context path="" debug="0" docBase="myapp" />
```

```
</Host>
```

**2. Auto Reloadable:**

a. **File:** *context.xml*

```
<Manager pathname="" />
```

**3. Changing the webapps location:**

a. **File:** *Server.xml*

```
<Host name="localhost" appBase="/home/shekhar/applications"
unpackWARs="true" autoDeploy="true">
```

**4. Auto Deploying the Servlet:**

a. **File:** *Server.xml*

```
<Context path="" debug="0" docBase="myapps" reloadable="true" />
```
